A Message from the State Director of Pupil Transportation

At the start of the 2021-2022 school year, there was a concerted effort to bring students back to the classroom as a large number of students spent the prior school year with virtual learning or in a hybrid format. The demands on staff in transportation departments could not have been higher since the focus was to effectively transport students back to in-person learning in a safe manner following a difficult and challenging summer due to the ongoing pandemic.

Since many school systems operated virtually throughout the 2020-2021 school year, the data that was collected was drastically altered from the previous year's reports. Following the dramatic decrease in riders in school year 2020-2021, the 2021-2022 school year brought about a similar altered report but in a positive direction. This was due to all school systems being open for in-person learning. Still, the figures in this report do not reflect the normal ridership numbers and route miles traveled that school systems historically report as some parents chose to transport their children to and from school, students opted to remain virtual, and a pervasive driver shortage forced some school systems to be unable to cover some routes.

The MSDE Office of Pupil Transportation continues to applaud the work done by the school vehicle drivers, attendants, routers, trainers, special education experts, and office staff throughout this ongoing, unyielding pandemic. You are all to be commended on your efforts to get your students to and from school daily.

Regards,

A handwritten signature in cursive script, appearing to read "Gabriel D. Rose".

Gabriel D. Rose
State Director of Pupil Transportation

Chart 4 (continued)

Vehicle Types (as defined in the 2010 National School Transportation Specifications and Procedures Manual):**Conventional School Buses:**

Type A: A conversion or body constructed and installed upon a van-type compact truck or front section vehicle, with a GVWR of 14,500 pounds or less, designed for carrying more than 10 persons.

Type B: A conversion or body constructed and installed upon a van or front-section chassis, or stripped chassis, with a GVWR of more than 10,000 pounds, designed for carrying more than 10 persons. Part of the engine is beneath and/or behind the windshield and beside the driver's seat. The entrance door is behind the front wheels.

Type C: A body installed upon a flat back cowl chassis with a GVWR greater than 21,500 pounds, designed for carrying more than 10 persons. The entire engine is in front of the windshield and the entrance door is behind the front wheels.

Transit / Transit-Style Bus:

Type D: A body installed upon a chassis, with the engine mounted in the front midship, or rear, with a GVWR great than 21,500 pounds, designed for carrying more than 10 persons. The engine may be behind the windshield and beside the driver's seat; it may be at the rear of the bus behind the rear wheels, or mid-ship between the front and rear axles. The entrance door is ahead of the front wheels.
